CONCEPT NOTE ON EDUCATION AS THE 
AU THEME OF THE YEAR FOR 2024

THEME:

Educate an African fit for the 21st Century: Building resilient education systems for increased access to inclusive, lifelong, quality, and relevant learning in Africa.
1. Rationale for the proposal of Education as AU Theme of the Year 2024

1. It is noteworthy to mention that Education, was never considered before as the AU Theme of the year.

2. From 17 to 19 September 2022, the UN Secretary General, M. Antonio Guterres convened a global Summit on Transforming Education. Amidst so many other serious global matters, this summit was deemed urgent and given priority, on grounds that, globally, education is in deep crisis, and progress towards the attainment of Sustainable Development Goal 4 on education (SDG4), was badly off track.\(^1\) That is why the SG wanted to impulse “a one-in-a-generation” opportunity to address this global education crisis by renewing collective commitment and joint action.

3. Africa weighs heavier than other continents in the gaps towards achievement of SDG4 objectives, which are also reflected in our Continental Education Strategy CESA (16-25).

4. In this context, the ESTI Department, in collaboration with its UN and other partners, notably UNESCO, UNICEF, and WFP meticulously prepared and coordinated the organization of an AU High-level side event, which took place on the 20 September 2022 in New York.

5. The preparatory process started as early as June 2022. HE, the Commissioner for ESTI, set up a task team which was highly inclusive, bringing together AU clusters on Education, technical expertise from the Continent and abroad, development partners, civil society, private sector and youth representatives. The task team engaged in iterative exercises aimed at coming up with a series of concrete, realistic recommendations which served as a basis for a formal declaration submitted to the AU High Level side-event and constituted a roadmap for Member States and the AU Commission to translate the Transforming Education Summit’s recommendations into actions, tailored to the African context.

6. The draft declaration was reviewed and adopted by the 4\(^{th}\) session of the Specialised Technical Committee on Education, Science and Technology (STC-EST4).

7. On 20 September 2022, the High-level side event on Transforming Education in the specific context of Africa was held in the premises of the AU in New York. It was chaired by HE President Macky Sall, in his capacity as the Chair of the African Union, in the presence of HE Moussa Faki Mahamat, Chairperson of the AUC.

---

\(^1\) Report by UNESCO Institute of Statistics (UIS) and the Global Education Monitoring (GEM) Report on “Meeting Commitments: Are Countries on Track to Achieving SDG4?”
8. Several African Heads of State, Prime Ministers, Ministers of Education attended the event and made bold statements, stressing the progress made in education, but also the challenges and gaps to be taken up, particularly after the Covid 19 pandemic which compounded the status of education systems in the continent.

9. The DG of UNESCO, the Executive Directors of UNICEF and WFP, EU, GPE and other partners’ representatives, including youth representatives, private sector, NGOs, partook to the meeting. They welcomed the organization of the event and reaffirmed their commitment to work with the AUC and Member States to intensify efforts aim at bridging the gaps towards the attainment of the education related objectives in Africa.

10. H.E Moussa Faki Mahamat proposed, in his speech, that, to keep the momentum and impetus given by the UN Secretary General, and by the AU leadership and Member states which attended the side-event, Education should be considered as the AU Theme of the Year 2024.

   “The adoption of Education as the theme of AU for 2024 will, I am sure, enshrine the commitments made here in NY as a true credo of mobilization for education in Africa”, he said.

11. Virtually all interveners largely echoed and supported the proposal, from Heads of States to Partners to the representatives of African Youth.

12. After panel discussions, the final declaration was presented and unanimously adopted.

   In its “context paragraph”, the declaration recalls that “Education remains a basic human right as outlined in article 26 of the Universal Declaration of Human Rights, article 28 of the Convention on the rights of the child and article 11 of the African charter on the rights and welfare of the child, all of which emphasizing the need for State parties to provide free and compulsory basic education.” The first two paragraphs, under the “Commitments" section, read as follows:

   “We reiterate our commitments and our call for all AU member states:
   1. To work towards the achievement of the Continental Education Strategy for Africa 2016 to 2025 and education-related targets of the Sustainable Development Goals, in particular SDG 4.
   2. To advocate for Education to be the AU theme of the year for 2024 and for the implementation of the call by the UN Secretary General to transform education globally.”

13. It is against this backdrop that this proposal of choosing Education as the theme of the Year 2024 was submitted for the consideration and adoption by the Assembly summit in its 36th ordinary session of February 2023.

2. A snapshot of Education sector in Africa
Recent reviews of the CESA (16-25) and Education 2030 Framework for Action, the AU-UNESCO continental report of the CESA and SDG4 and a joint AU-UNICEF report on Transforming Education in Africa, point to the fact that over the past ten years, African Governments have undertaken a wide range of programmes and policy-level efforts to ensure that no child is left behind in access to education. There have been substantial efforts on the continent to ensure access, completion, and quality of basic education for all.

Overall, the proportion of out-of-school children had decreased until around 2010. The completion rates had improved in primary and lower secondary education, as well as the access to and the participation in TVET. There was also noticeable progress in the access to pre-primary education and in adult literacy and lifelong learning. With regards to School Feeding, low-income countries, have doubled their national budget expenditures to HGSF from 17 percent to 33 percent between 2013 and 2020. In lower middle-income countries, national budgets now account for 88% of school meals financing, up from 55% in 2013.

However, despite efforts and progress made, four main indicators ring a warning bell:

- Although the Out of school rate, i.e the “proportion of children and young people in the official age range for the given level of education who are not enrolled in pre-primary, primary, secondary or higher levels of education” keeps steadily decreasing, especially for the primary level, the absolute number has reached the alarming global estimate of 98 million in Africa (see figure 1 below).
- The learning poverty rate, i.e “the share of children who cannot read a simple text with comprehension by age 10 was the highest in sub-Saharan Africa before COVID-19 pandemic, at 86%. This rate is likely to have worsened after the pandemic, estimated now at 90%. This means that nine out of ten children cannot read a simple text with comprehension by age 10. (see figure 2 below)
- Africa will need 17 million additional teachers to achieve universal primary and secondary education by 2030.
- It is estimated that Africa will account for more than 90% of global external financing needs for education by 2030, with an additional US $40 billion needed to finance education to achieve SDGs for education, and move towards meeting the aspirations of Africa’s agenda 2063.

---

2 Education in Africa- Placing equity at the heart of policy: [https://unesdoc.unesco.org/ark:/48223/pf0000384479](https://unesdoc.unesco.org/ark:/48223/pf0000384479)

4 World Bank: The State of Global Learning Poverty: 2022 Update

Looking closely at each specific goal in CESA 16-25 or in the SDG4, one realizes the urgency to transform and revitalize the entire education system on the continent, while paying special attention to marginalized groups including girls, children in rural areas, those living with disabilities, and those in the move, including those in fragile countries and contexts.

At the Global level, and within the Global Education Coordination Mechanism framework, led by UNESCO, the African Union has been a key player in the regional coordination of CESA and SDG4 support for and cooperation among countries. This is through convening Member States and partners and making critical contributions to promoting evidence use, priority setting, peer learning and monitoring mechanisms.

At global level the need to address some of the challenges in a holistic manner is gaining momentum. For instance, the recent recommendations and urgent call for action of the Secretary-General’s High Level Panel on the Teaching Profession7 is an important milestone in the attempts to rehabilitate a profession without which no progress could be foreseen in the future.

Likewise, there is a consensus that more funds are needed globally to rescue education systems, particularly in Africa. The idea of improving the coordination of financing across multilateral agencies at the global level and exploring innovative financing mechanisms based on the experience of other sectors is taking shape. The AU being now a member of the G20, could add its voice to other voices to advocate for such development to happen sooner than later.

Meanwhile, at continental level, in response to the financing gap of education8 and as requested by the AU Summit in 2008, reaffirmed by the Executive council in 20209, the African Education Science Technology and Innovation Fund (AESTIF) is being developed with a high potential for employment and wealth creation leading to industrialization and economic transformation to achieve the SDGs and aspirations of Agenda 2063. Initiated, owned, and managed by Africa, through the African Development Bank, the Fund is designed to be a blended finance mechanism. AESTIF aims at pooling US$ 300 million via innovative financing mechanisms.

The Specialized Technical Committee on Education, Science, Technology and Innovation (STC-EST4) held on 1st and 2nd September 2022, Ministers in their Declaration on Education, Science, Technology and Innovation10 requested the Commission to facilitate the adoption by the AU of an Education related theme for the year for 2023, to address the burden and disruptions caused by COVID-19 on Education Systems, promote the

Figure 2
In summary,

Despite the significant progress made in Africa over the past two decades in terms of access, completion and quality of basic education, disparities persist within and between countries. Learning achievement remains low in many parts of Africa. Girls, children from the poorest backgrounds, children with disabilities and children on the move such as forcibly displaced, face difficulties in realizing their right to education. Limitations also continue to exist in the teacher development in Africa with recurrent teacher shortages coupled with lack of professional development opportunities and low status and working conditions. Multiple, protracted emergencies have gravely impacted on educational provision, including increased attacks on schools. There is an urgent need to strengthen peace education and cultivate a culture of peace and tolerance at all levels of education - formal, informal and non-formal.

These systemic challenges range from early childhood education, through primary and secondary education, technical and vocational education, and training to tertiary and higher education levels.

The COVID-19 pandemic exacerbated the limitations of the current education models at all levels, compounding inequalities in education and squarely threatening to set back decades of progress, albeit insufficient, in Africa.
In this context, if nothing is done to transform and revitalize education in Africa, the achievement of the Continental Education Strategy for Africa (CESA\textsuperscript{11} 2016-2025), SDG 2030 and the AU Agenda 2063 is compromised. Without swift, well-coordinated remedial action, the targets for reducing learning poverty in Africa will not be met. The consequences for children and society will be devastating, with long-term negative effects on children’s life outcomes, including their learning, health (physical and mental), nutrition and socioeconomic development. Business as usual focus is simply no longer viable.

Progress in Education has a far-reaching impact on all the other aspects of human capital development. The large population of young people in Africa is a powerful source of economic growth and progress, provided it receives quality education and skills for the 21\textsuperscript{st} century job opportunities. Investing in Education is thus, the most effective investment in the fight against poverty, reducing gender inequalities, enabling people to survive and thrive and helping to improve socioeconomic development. Education is also associated with more peaceful communities, greater civic engagement, and stronger democracies.

3. Prospects of Education as the AU Theme of the Year for 2024

Year 2024 dedicated to Education in Africa will be a single opportunity for the African Union to re-galvanize Member States towards the achievement of CESA and SDG4 targets. Importantly, this will come as a follow-up to the STC-EST4, AU-HLSE Declarations, the Urgent Call for Action by the SDG4 High-level Steering Committee\textsuperscript{12} and the UN Secretary General’s Vision Statement on Transforming Education\textsuperscript{13}. It will engage the AU Commission to mobilize Governments and Development partners to rethink the models of education and skill development needed for the Africa we want in the 21\textsuperscript{st} century.

Focus will be on development and implementation of effective, long-lasting, system-wide transformational strategies for education in Africa, and recovery from COVID-19, building resilience and transformation, riding on the global momentum. It is also expected to spur implementation of the declarations emanating from the key continental and global education moments including the fourth ordinary session of the Specialized Technical Committee on Education, Science and Technology (STC-EST4), the declarations from both the UN Transforming Education Summit, the High-level Side Event on Transforming Education in Africa as well as the Youth Manifesto on Transforming Education in Africa

\textsuperscript{11} The CESA aims at “Reorienting Africa’s education and training systems to meet the knowledge, competencies, skills, innovation and creativity required to nurture African core values and promote sustainable development at the national, sub-regional and continental levels”

\textsuperscript{12} The High-Level Steering Committee is the apex body for global coordination and monitoring of SDG 4

\textsuperscript{13} The UN Secretary General Vision Statement was informed by extensive and inclusive preparatory process
which resulted from youth consultations in 2023 and was presented at the HLSE in New York.

4. Proposed Theme

**Educate an African fit for the 21st Century - Building resilient education systems for increased access to inclusive, lifelong, quality, and relevant learning in Africa.**

Above is the proposed theme of the year 2024. It will be structured around sub-themes encompassing the entire education and skills development spectrum from early childhood education and development through to tertiary and vocational education and life-long learning. Focus will be on development and implementation of effective, long-lasting, system-wide transformational strategies for education in Africa, and addressing the constrained education financing landscape. The role of teachers as key agents of transformation will be emphasized, as teachers need to be adequately supported and empowered to play their part for this transformation to take place.

To celebrate the theme of the year, a variety of activities are proposed to be implemented at national, regional, continental, and global levels. Activities envisaged are expected to foster the implementation of the Declaration of the STC-EST4, the Declaration of the High-Level Side event on Transforming Education in Africa and the UN Transforming Education Summit thematic action tracks towards building responsive and resilient education systems in Africa. Implementation shall be under the technical leadership and coordination of the Department of Education, Science, Technology and Innovation of the AU Commission in close collaboration with the Committee of Ten Head of States (C10) on Education in Africa. The Department will work closely with the AU Member States (including through the STC), RECs, Development partners, UN Agencies and all Education Stakeholders including the private sector and the youth.

Having Education as the theme of the year 2024 will further drive momentum generated at Transforming Education Summit (TES) and, working with Member States and partners, place a continental spotlight on recovery from COVID-19 and building resilient systems for increased access to inclusive, quality and relevant Education in Africa. This shall be through concrete impactful actions implemented in African Union Member States towards the transformation of education in Africa.
Annex 1. Roadmap for AU Theme of Year 2024

National, regional, continental and global activities will be implemented throughout the year in commemoration of the AU theme of the year 2024. These commemorative actions will serve as an opportunity to reaffirm the political commitment of African governments to Education. Among these moments will include:
